

# PS-1 40ft Boxcar Kit Version 2

## For Train Simulator 2013 by Golden Age of Railroading

This Pack includes five ready to run PRR lettered PS-1 40ft boxcars in five different configurations (roofwalks, doors). However, the real purpose of this pack is so that you can repaint the cars. To make it easier for you to create specific versions of the PS-1 boxcar, several components of the model are included as interchangeable "child objects", which must be added with the car's main BIN file (see the Children entries at the very end of the file).

**Credits:** For the production of this add-on, I have used source materials from:

- Rick Grout, GTraxSims.com (sound files)
- MediaCollege.com (sound files)
- CGTextures.com (image files)

### Child Objects Included in this Pack:

- 6' Youngstown Doors (texture: x50\_door-youngs)
- 9' Youngstown Doors (texture: x50\_door-youngs)
- 6'+9' Youngstown Double Doors (texture: x50\_door-youngs)
- 6' Superior Doors (texture: x50\_door-sup)
- 9' Superior Doors (texture: x50\_door-sup)
- 10' Plug Doors (texture: x50\_door-plug)
- standard roofwalk assembly (textures: 40ft-ps1\_roofwalk1, 40ft-ps1\_brake1, x50\_main\_standard40)
- simple chopped roofwalk assembly (textures: 40ft-ps1\_roofwalk1, 40ft-ps1\_brake1, x50\_main\_standard40)
- fully chopped roofwalk assembly (textures: 40ft-ps1\_roofwalk1, 40ft-ps1\_brake1, x50\_main\_standard40)
- old roof construction (texture: x50\_main\_standard40)
- new roof construction (texture: x50\_main\_standard40)

A layered repaint texture kit in Photoshop format is available upon request, please email me if you would like to have the texture kit.

## System Requirements and Installation:

**System Requirements:** Train Simulator 2013 must be installed, there are no special hard- or software requirements which would exceed those of the game itself.

### Installation:

1. Download the .RWP file and save it in a secure place on your hard disk – just in case you might have to reinstall the cars at a later time.
2. Launch [RailWorks](#) and select the [Package Manager](#) on the Welcome Screen.
3. Click the [Install](#) button, browse to the file from step one, click [Open](#). The package will be installed now, after which you can already run your new cars in the game!
4. To be able to place the cars in a scenario, you will first have to enable the [object filter](#) (left-hand mid flyout window, button that shows a blue cube with an orange triangle) for developer "[GreatNortherner](#)", product "[Allegheny](#)"
5. The cars will show up in the asset browser in the game listed as "[Boxcar 40ft-PS1 ...](#)".
6. All cars will be empty right after placing them in the scenario editor. To load a car, double click on it. When it is highlighted in dark red, tick the little 'cargo' checkbox in the right flyout window. You can also do this for entire consists in one go, all you need to do is to switch on the 'consist select' radio button in the lower left flyout window.

## Copyright, Repaints, Distribution, Warranty:

All of the contents of this software are [copyrighted material](#). You may use and include them in route uploads as long as they are free of charge. You may not redistribute the entire software package itself (the .rwp file).

You can do repaints of the included objects and you are allowed to distribute them as long as it is free of charge. If you wish to include the objects in a payware project of yours, please contact me first.

This software is provided to you on an "as is" basis without any express or implied [warranty](#) of any kind, including but not limited to any warranties of merchantability, noninfringement, or fitness of a particular purpose.

One or more textures on this 3D model have been created with images from CGTextures.com. These images may not be redistributed by default, please visit [www.cgtextures.com](http://www.cgtextures.com) for more information.
