

USRA 40' Boxcar Pack (Northwestern Roads)

for RS.com's Train Simulator 2013 by Golden Age of Railroading

The K7A was a stock car of the Pennsylvania Railroad. Built in the 1930s, well over a thousand of these cars entered service on the PRR. In the mid-1950s most of these cars were scrapped, only a handful survived into the early 1960s.

This add-on for Railworks includes the 40' cattle car in its classic PRR paint scheme. It comes in a version with cattle load and an empty version with open doors (not animated).

For route builders who do not like to install this car, a third package file is available that includes only the cows as scenery objects for the route editor.

Credits: For the production of this add-on, I have used source materials from:

- Rick Grout, GTraxSims.com (sound files)
- MediaCollege.com (sound files)
- CGTextures.com (image files)

System Requirements and Installation:

System Requirements: Train Simulator 2013 must be installed, there are no special hard- or software requirements which would exceed those of the game itself.

Installation:

1. Download the .RWP file and save it in a secure place on your hard disk – just in case you might have to reinstall the cars at a later time.
2. Launch [RailWorks](#) and select the [Package Manager](#) on the Welcome Screen.
3. Click the [Install](#) button, browse to the file from step one, click [Open](#). The package will be installed now, after which you can already run your new cars in the game!
4. To be able to place the cars in a scenario, you will first have to enable the [object filter](#) (left-hand mid flyout window, button that shows a blue cube with an orange triangle) for developer "[GreatNortherner](#)", product "[SteamEra](#)"
5. You will now find the cars in the assets browser, listed under "[Stock Car ...](#)"
6. All cars will be empty right after placing them in the scenario editor. To load a car, double click on it. When it is highlighted in dark red, tick the little 'cargo' checkbox in the right flyout window. You can also do this for entire consists in one go, all you need to do is to switch on the 'consist select' radio button in the lower left flyout window.

Copyright, Repaints, Distribution, Warranty:

All of the contents of this software are [copyrighted material](#). You may use and include them in route uploads as long as they are free of charge. You may not redistribute the entire software package itself (in other words: the .rwp file).

You can do repaints of the included models and you are allowed to distribute them as long as it is free of charge. You do not have to ask for permission to do a repaint of

these freeware models, however I would appreciate a short notice just so I know who is working on what, if only to prevent potential parallel projects.

If you wish to include the objects in a payware project of yours, please contact me first.

This software is provided to you on an "as is" basis without any express or implied [warranty](#) of any kind.

One or more textures on this 3D model have been created with images from CGTextures.com. These images may not be redistributed by default, please visit www.cgtextures.com for more information.
