4 Support, Dovetail Games Disclaimer

Scenario Description

This is a two-part scenario that puts you in charge of the San Diegan, Santa Fe's express passenger service between Los Angeles and San Diego. You will drive train 72, leaving L.A. Union Station in the morning. There is a lot of traffic on the line, especially in and around L.A., however you'll have priority over all the freights.

The scenario uses a timetable which is based on the real 1950s San Diegan. Some minor modifications had to be made to the timings or you would not have been able to reach some of the intermediate stations in time. Timings are still tight, especially on the closely spaced stations in the middle part of the run, so crack on and be decisive on the brakes.

Please note that you will meet the northbound San Diegan on single track territory in part 2 of the scenario.

Duration: 85 minutes (part 1) + 95 minutes (part 2)
Difficulty: moderate to difficult
timetabled passenger train
several station stops

Installation and System Requirements

System Requirements: Train Simulator 2015 must be installed. Backwards compatibility to older versions of Railworks/Train Simulator cannot be guaranteed.

Installation:

1. Download the **RWP file** and save it in a secure place on your hard disk.

2. Now install the RWP file with Train Simulator's Package Manager. To access that tool, **launch utilities.exe** in the main Train Simulator installation folder.
3. Note: You can find utilities.exe by right clicking on the Train Simulator 2015 title in your Steam Library, selecting Properties, and then clicking the "Browse Local Content" button on the "Local Files" tab.
4. Once the Utilities are running, go to the **Package Manager Tab**, click the **Install** button, browse to the file from step one, click **Open**. The package will be installed now, after which you can already run the scenario in the game!
5. You'll find the scenario listed in the **Standard Scenarios** Tab for the selected route.

Rolling Stock Requirements: The add-ons and DLC packs listed below are needed to play this scenario.

Read this if you do not want to download or buy quite so many files: With the help of Mike Simpson's (donationware) RW_Tools suite of utilities you can quite easily substitute any piece of equipment used in this or any other scenario. Please read on here for more information about RW_Tools: www.rstools.info
