

# Great Northern "Train 6 Cascadian"

for DTG Train Simulator 2015 by Golden Age of Railroading

## 1 Scenario Description

## 2 Installation and System Requirements

## 3 Copyright, Repaints, Distribution, Warranty

## 4 Support, Dovetail Games Disclaimer

### 1 Scenario Description

This three-part scenario puts you in charge of Great Northern's daily all-stops passenger train from Seattle across Stevens Pass to Spokane. You are in control from Everett to Wenatchee.

The scenario has been split into three parts and uses several free- and payware add-ons. Real world timetable data of the late 1950s Cascadian (Train #6) was used for this scenario, only minor changes had to be made due to the few changes that were done to this railroad line in the last half century.

Duration: 240 minutes  
Difficulty: moderate  
timetabled passenger train  
many station stops

### 2 Installation and System Requirements

**System Requirements:** Train Simulator 2015 must be installed. Backwards compatibility to older versions of Railworks/Train Simulator cannot be guaranteed.

### Installation:

1. Download the **RWP file** and save it in a secure place on your hard disk – just in case you might have to reinstall the cars at a later time.
2. Now install the RWP file with Train Simulator's Package Manager. To access that tool, **launch utilities.exe** in the main Train Simulator installation folder.
3. Note: You can find utilities.exe by right clicking on the Train Simulator 2015 title in your Steam Library, selecting Properties, and then clicking the "Browse Local Content" button on the "Local Files" tab.
4. Once the Utilities are running, go to the **Package Manager Tab**, click the **Install** button, browse to the file from step one, click **Open**. The package will be installed now, after which you can already run the scenario in the game!
5. You'll find the scenario listed in the **Standard Scenarios** Tab and by filtering or browsing to the Stevens Pass Route.

**Rolling Stock Requirements:** The add-ons and DLC packs listed below are needed to play this scenario.

*Read this if you do not want to download or buy quite so many files: With the help of Mike Simpson's (donationware) RW\_Tools suite of utilities you can quite easily substitute any piece of equipment used in this or any other scenario. Please read on here for more information about RW\_Tools: [www.rstools.info](http://www.rstools.info)*
