

Wooden Trestle Loft Objects for RailWorks

Modeled by Michael Stephan

Updated Package!

Now includes the following objects:

single track trestle lofts in 6 different heights

double track trestle loft with "three-story" height

System Requirements and Installation:

System Requirements: RailWorks needs to be installed, there are no special hard- or software requirements which would go beyond those of the game itself.

Installation:

1. Download the .RWP file and save it in a secure place on your hard disk – just in case you might have to reinstall it at a later time.
2. Launch RailWorks and select the [Package Manager](#) on the Welcome Screen.
3. Click the [Install](#) button, browse to the file from step one, click [Open](#). The package will be installed now, after which you can already use the new assets in the game!
4. To be able to place the objects in a route, you will first have to enable the [object filter](#) (left-hand mid flyout window, button that shows a blue cube with an orange triangle) for developer "GreatNortherner", product "GNRy".
5. You will now find the objects in the left-hand flyout assets browser, listed under the procedural objects (tracks, roads, etc.) in the "misc." category.

Placement:

To place these trestle bridges in your route, simply select the "GN Trestle" from your loft objects (Misc category) and place them like you would place a road or track loft. The loft section itself is transparent, the bridge construction consists of 5m long segments. They overlap slightly so you can place them on curves too.

Use the gradient tool to place on slopes and you will see that RailWorks deforms the shapes of the bridge segments, aligning them to the gradient.

Copyright, Repaints, Distribution, Warranty:

All of the contents of this software are [copyrighted material](#). You may use and include them in route uploads as long as they are free of charge. You may not redistribute the entire software package itself (the .rwp file).

You can do repaints of the included objects and you are allowed to distribute them as long as it is free of charge. If you wish to include the objects in a payware project of yours, please contact us first.

This software is provided to you on an "as is" basis without any express or implied [warranty](#) of any kind.

One or more textures on this 3D model have been created with images from CGTextures.com. These images may not be redistributed by default, please visit www.cgtextures.com for more information.
