

# Great Northern Ry. Speed Posts and WX Sign for RailWorks

by Golden Age of Railroading

## System Requirements and Installation:

**System Requirements:** **RailWorks** needs to be installed, there are no special hard- or software requirements which would go beyond those of the game itself.

### Installation:

1. Download the .RWP file and save it in a secure place on your hard disk – just in case you might have to reinstall it at a later time.
2. Launch **RailWorks** and select the **Package Manager** on the Welcome Screen.
3. Click the **Install** button, browse to the file from step one, click **Open**. The package will be installed now, after which you can already use the new assets in the game!
4. To be able to place the objects in a route, you will first have to enable the **object filter** (left-hand mid flyout window, button that shows a blue cube with an orange triangle) for developer "GreatNortherner", product "GNRy".
5. You will now find the objects in the left-hand flyout assets browser, listed under Track Infrastructure as "GN Speedsign / Whistle Post..."

## Placement

Place the objects just like any other scenery object. The speed posts work like normal RW speed posts, that means after placing them you will need to link the light blue arrow gizmo to the track, which will then make that track section's speed limit show up on the speed sign.

Please note: These speed signs only support speeds up to 99 mph.

### The prototypical way to use them would be as follows:

#### 1) For a reduction of permitted speed

- The white diagonal speed signs serve as warning signs for reduced speed limits further down the line.
- At the location where the reduced speed limit actually begins, you will need to place one of the TIGER signs. The GN usually did not post a sign showing the limit (in numbers) again, the engineer would have to keep them in mind from the warning sign or simply know them

#### 2) For a raised speed limit

- A white diagonal speed sign would be placed at the location where the speed limit increases. No tiger signs would be used in this case.

## **Copyright, Repaints, Distribution, Warranty:**

All of the contents of this software are [copyrighted material](#). You may use and include them in route uploads as long as they are free of charge. You may not redistribute the entire software package itself (the .rwp file).

You can do repaints of the included objects and you are allowed to distribute them as long as it is free of charge. If you wish to include the objects in a payware project of yours, please contact us first.

This software is provided to you on an "as is" basis without any express or implied [warranty](#) of any kind.
