# '*Rural America Main Street*' Houses for RailWorks
Inspired by StreetView Walks through East Coast and Midwestern Towns

This package offers you several two to four story 'main street' houses with various differences in wall textures, windows, and details.

These models are all very low-poly (only around 100 triangles per house!) and each uses only a limited number of average sized textures. These models can be used in large numbers without causing a major performance decrease. Detailing of the models is good enough to use them fairly close to the tracks, too, just avoid placing the ones with the 'paint-on' fire escapes at too close a viewing distances or the missing 3D parts for the fire escapes gets very obvious.

Night lit windows are included!

Installation:

1. Download the .RWP files and save them in a secure place on your hard disk – just in case you might have to reinstall it at a later time.
2. Launch RailWorks and select the Package Manager on the Welcome Screen.
3. Click the Install button, browse to the file from step one, click Open. The package will be installed now, after which you can already use the new assets in the game!
4. To be able to place the objects in a route, you will first have to enable the object filter (left-hand mid flyout window, button that shows a blue cube with an orange triangle) for developer "GreatNortherner", product "GNRy".

5. You will now find the objects in the left-hand flyout assets browser, listed under Domestic Buildings as "GN Main Street ..."
6. There are also three 'FlexiRows' of these houses available to you in the world editor. Each of these has several of these houses 'strung up' as a single string of objects that will follow the terrain when you place them.

Copyright, Repaints, Distribution, Warranty:

All of the contents of this software are copyrighted material. You may use and include them in route uploads as long as they are free of charge. You may not redistribute the entire software package itself (the .rwp file).

You can do repaints of the included objects and you are allowed to distribute them as long as it is free of charge. Actually, please feel encouraged to repaint these models and publish them. We need more variety in RailWorks!

If you wish to include the objects in a payware project of yours, please contact us first so we can make a deal.

This software is provided to you on an "as is" basis without any express or implied warranty of any kind.

One or more textures on this 3D model have been created with images from CGTextures.com. These images may not be redistributed by default, please visit www.cgtextures.com for more information.
