

Trackside Snowdrift Loft for RailWorks

This is a loft model of a quite large snowdrift along the tracks, shapes as though a snow plow had just passed through.

Placement is simple with this being a loft object, you can either place it freely like any other loft, or to get it placed very accurately, use the offset tool. The snowdrift loft has its object center exactly at the inner side (where the plow would have cut through), so the offset value would be about half the width of your train – for a good visual effect, use about 1.6 to 1.8 meters for US trains here.

This object has an all-transparent main texture, the snow texture is in the “_wi” texture – which also means that you can only place it when you are in a winter scenario.

Installation:

1. Download the .RWP files and save them in a secure place on your hard disk – just in case you might have to reinstall it at a later time.
2. Launch [RailWorks](#) and select the [Package Manager](#) on the Welcome Screen.
3. Click the [Install](#) button, browse to the file from step one, click [Open](#). The package will be installed now, after which you can already use the new assets in the game!
4. To be able to place the objects in a route, you will first have to enable the [object filter](#) (left-hand mid flyout window, button that shows a blue cube with an orange triangle) for developer “[GreatNorthernner](#)”, product “[GNRy](#)”.
5. You will now find the objects in the left-hand flyout assets browser, listed in the water lofts group on the Network items panel as “[Snowdrift ...](#)”

Copyright, Repaints, Distribution, Warranty:

All of the contents of this software are [copyrighted material](#). You may use and include them in route uploads as long as they are free of charge. You may not redistribute the entire software package itself (the .rwp file).

You can do repaints of the included objects and you are allowed to distribute them as long as it is free of charge. Actually, please feel encouraged to repaint these models and publish them. We need more variety in RailWorks!

If you wish to include the objects in a payware project of yours, please contact us first so we can make a deal.

This software is provided to you on an "as is" basis without any express or implied [warranty](#) of any kind.

One or more textures on this 3D model have been created with images from CGTextures.com. These images may not be redistributed by default, please visit www.cgtextures.com for more information.
