

Telegraph Scenery Objects for RS.com's RailWorks

by Golden Age of Railroading

System Requirements and Installation:

System Requirements: **RailWorks** needs to be installed, there are no special hard- or software requirements which would go beyond those of the game itself.

Installation:

1. Download the .RWP file and save it in a secure place on your hard disk – just in case you might have to reinstall it at a later time.
2. Launch **RailWorks** and select the **Package Manager** on the Welcome Screen.
3. Click the **Install** button, browse to the file from step one, click **Open**. The package will be installed now, after which you can already use the new assets in the game!
4. To be able to place the scenery items in a route, you will first have to enable the **object filter** (left-hand mid flyout window, button that shows a blue cube with an orange triangle) for developer "GreatNortherner", product "GNRy"
5. For further information please see the picture tutorial on how to place these objects.

Copyright, Repaints, Distribution, Warranty:

All of the contents of this software are **copyrighted material**. You may use and include them in route uploads as long as they are free of charge. You may not redistribute the entire software package itself (the .rwp file).

You can do repaints of the included objects and you are allowed to distribute them as long as it is free of charge. If you wish to include the objects in a payware project of yours, please contact us first.

This software is provided to you on an "as is" basis without any express or implied **warranty** of any kind.
