

GN TramTrax

for Train Simulator 2014 by Golden Age of Railroading

1 Introduction

2 Installation and System Requirements

3 Copyright, Repaints, Distribution, Warranty

4 Support, RS.com Disclaimer

1 Introduction

The GN TramTrax package consists of seven tramway track lofts. Included are three open-surface track types (concrete ties, old wooden ties, road bed covered in gravel) and four covered surface track types (new concrete panels, old concrete panels, pavement, tarmac). Each track loft has a single-wire overhead trolley wire at default height offset.

You must own the European Loco and Assets Pack from Railsimulator.com's Steam Store before you can use these tracks as they utilize the Kuju sounds.

2 Installation and System Requirements

System Requirements: Train Simulator 2014 must be installed and you must own the European Loco and Assets Pack from Railsimulator.com's Steam Store. Backwards compatibility to older versions of Railworks/Train Simulator cannot be guaranteed.

Installation:

1. Download the [RWP file](#) and save it in a secure place on your hard disk – just in case you might have to reinstall the cars at a later time.
2. Now install the RWP file with Train Simulator's Package Manager. To access that tool, [launch utilities.exe](#) in the main Train Simulator installation folder.
3. Note: You can find utilities.exe by right clicking on the Train Simulator 2014 title in your Steam Library, selecting Properties, and then clicking the "Browse Local Content" button on the "Local Files" tab.
4. Once the Utilities are running, go to the [Package Manager Tab](#), click the [Install](#) button, browse to the file from step one, click [Open](#). The package will be installed now, after which you can start using the tracks in the editor!

Using the Tracks in Your Route:

1. To be able to place the tracks in your route, you will first have to enable the [object filter](#) for these objects in the scenario editor:
2. Open the left-hand middle flyout panel, click the button that shows a blue cube with an orange triangle.
3. Activate the flyout panel on the right side of the screen, and tick the checkboxes for developer "[GreatNortherner](#)" and product "[Tramways](#)"
4. The corresponding track rule for the tram tracks is: "[GN TramTrax](#)"
5. You will now find the tracks listed in the track building panel in the route editor and can start building your tram network.

4 Copyright, Repaints, Distribution, Warranty

All of the contents of this software are copyrighted material and may only be further distributed or reused in freeware projects.

Please feel free to repaint the tracks and to share your repaints with the community.

You may also include the tram tracks in your freeware route's uploads. Please contact me should you wish to use the tracks in a payware project.

This software is provided to you on an "as is" basis without any express or implied warranty of any kind, including but not limited to any warranties of merchantability, noninfringement, or fitness of a particular purpose.

One or more textures on this 3D model have been created with images from CGTextures.com. These images may not be redistributed by default, please visit www.cgtextures.com for more information.
