

Animated Waterfall Scenery Objects for RailWorks

Modeled by Michael Stephan

Waterfall Objects with two textures in two sizes each.

These are simple one-sided static scenery objects, using UV-scrolling to achieve the looks of the flowing ('falling') water. Extremely low poly! The spray effect is not included, in the picture above I used the default cooling tower, lowered below the ground, for this effect.

System Requirements and Installation:

System Requirements: **RailWorks** needs to be installed, there are no special hard- or software requirements which would go beyond those of the game itself.

Installation:

1. Download the .RWP files and save them in a secure place on your hard disk – just in case you might have to reinstall it at a later time.
2. Launch [RailWorks](#) and select the [Package Manager](#) on the Welcome Screen.
3. Click the [Install](#) button, browse to the file from step one, click [Open](#). The package will be installed now, after which you can already use the new assets in the game!
4. To be able to place the objects in a route, you will first have to enable the [object filter](#) (left-hand mid flyout window, button that shows a blue cube with an orange

triangle) for developer "GreatNortherner", product "GNRy".

5. You will now find the objects in the left-hand flyout assets browser, listed under Foliage / Water as "Waterfall..."

Copyright, Repaints, Distribution, Warranty:

All of the contents of this software are [copyrighted material](#). You may use and include them in route uploads as long as they are free of charge. You may not redistribute the entire software package itself (the .rwp file).

You can do repaints of the included objects and you are allowed to distribute them as long as it is free of charge.

If you wish to include the objects in a payware project of yours, please contact us first so we can arrange a deal.

This software is provided to you on an "as is" basis without any express or implied [warranty](#) of any kind.

One or more textures on this 3D model have been created with images from CGTextures.com. These images may not be redistributed by default, please visit www.cgtextures.com for more information.
